

CODE RESCUE

THREE-ROUND DEBUGGING CHALLENGE

Code Rescue is an engaging three-round debugging challenge that tests participants' **coding knowledge, debugging ability, logical thinking, accuracy, and problem-solving skills**. Participants race against time to identify bugs, understand faulty programs, correct errors, and produce the expected results.

EVENT HIGHLIGHTS

FORMAT	3 Progressive Rounds	FOCUS	Debugging & Logic
SKILLS	Accuracy • Speed • Analysis	CHALLENGE	Basic → Advanced

ROUND-WISE CHALLENGE

01	BUG HUNT Identify and fix syntax errors, missing statements, and basic coding mistakes in short programs.
02	LOGIC BREAKER Debug programs containing logical and runtime errors and determine the correct output.
03	CODE RESCUE Tackle a challenging broken program, debug it completely, test the solution, and submit the correct output within the time limit.

OBJECTIVE

The objective of Code Rescue is to provide participants with a competitive platform to demonstrate their programming, debugging, analytical, and time-management skills while solving progressively challenging coding problems.

Think. Debug. Fix. Rescue the Code!

A challenge where every bug matters and every second counts.
